ACIDITY: SOFT & MILD

BODY: MEDIUM, CREAMY

ORIGIN

COUNTRY: BRAZIL

REGION: SUL DE MINA

SOURCE: MULTIPLE PRODUCERS

PROCESSING: NATURAL/

: SWISS WATER

DECAFFEINATED

ADDITIONAL INFORMATION

We chose this natural processed decaffeinated Brazil for various reasons. The Swiss Water method uses water and charcoal filters in order to separate the caffeine from the coffee bean. This gentle method of decaffeination results in more of the inherent flavors of the bean to come through after the processing. The resulting cup is one that possesses sweet chocolate, a creamy body and sweet afternoons, without the majority of the caffeine.
