

BLEND

About our blends...

We use only the coffees that we have for sale as single origin to make our blends. We carefully choose the components that we want to feature and meticulously match our beans to create new coffees that show off the best of each bean. We believe our blends should be just as tasty as any of our single origin coffees.

Blend Offerings

Illuminator

Illuminator is a blend of two Brazilian coffees roasted together. Our current house espresso, this blend features sweetness, bright acidity, creamy body, and soft caramel notes. A blend that is just as tasty in drip form as it is an espresso.

Apocolypto

This blend features our Sumatra coffee roasted dark to bring out the caramel notes and smoky features that lovers of dark roast enjoy. It features flavors of bakers chocolate, smoky and spicy aromas and aftertaste

Direct Trade Blend

Blended for fans of breakfast blends, DTB features lovely flavors of caramel and chocolately toasted nuts.

Peacemaker

This blend is a great drip blend, but on the espresso machine it really shines. Chocolately flavors blend with sweet figs.
